DONJOY®
CRYOKNEE™

Compression, support and easy
cold/heat therapy integration

CRYOKNEE™

The CryoKnee™ brace combines comfortable softgoods with four-way stretch fabric for compression, support and ability to easily integrate cold/heat therapy. The rigid and malleable Range of Motion (ROM) hinges provide protected range of motion, medial/lateral stability and a customizable fit. Included therapy pad pouch attaches to the brace for optional cold or heat therapy (cold or hot pad sold separately).

COLD/HEAT THERAPY

Integrated cold or heat therapy pad pouch attaches easily to the brace and accommodates most cold/hot packs (packs sold separately). Breathable material reduces condensation and is a built-in barrier to help prevent skin irritation.

RIGID CUSTOMIZABLE ROM HINGES

Removable, lightweight rigid ROM hinges are customizable to contour to the anatomy. Adjustable flexion and extension settings to limit knee motion. Extension can be limited from 0°-90° and flexion can be limited from 0°-150°. The brace can also be locked out to immobilize the knee.

4-WAY STRETCH PATELLA FABRIC

Flexible four-way stretch fabric accommodates all patella sizes and provides light compression on patella to help reduce window edema.

TRIMMABLE

Customizable softgood can be trimmed and custom-fit to the patient's leg. Trim calf strap, high strap and/or open up popliteal area.

Universal sizing fits both right and left knee across a wide range of patients.
