

DonJoy® IceMan® Therapy Units help you manage pain and swelling with the controlled delivery of cold therapy. Here's how to keep your unit in top condition with cleaning and storing and keep you on the road to recovery.

CLEANING AND STORING

1. With dry hands, unplug the power cord from the back of the unit and the outlet
2. Empty the water/ice from cooler
3. Remove filter cap for cleaning
 - a. Filter cap is located at the bottom of the mixing chamber, inside the unit
 - b. Clean the filter cap then re-attach
4. Refill cooler with warm water to the fill line and add 1-2 tablespoons of bleach
5. Replace the lid, place unit on a dry level surface, connect the pad, and plug in
 - a. Let the unit run for 10 minutes
6. Empty the cooler and wipe the inside of the unit dry
 - a. Leave the lid off the unit for at least 1 day to air dry
7. Drain cold pad with the hose facing downward by pushing the ends of the connectors
 - a. Some residual water may remain in the pad.
